by BROSELEY

multifuel, woodburning, gas & electric stoves

Better make it Broseley

Broseley is named after the village in the heart of England where the family business was born nearly fifty years ago. Nearby the 18th century ironmasters forged the Industrial Revolution – a fitting origin for a company that uses traditional skills to build stoves in stout cast iron and sturdy steel to stand the test of time.

They also withstand the scientific tests required to meet the highest national and European standards of quality, safety and environmental performance. Our technical team also strives to balance innovation with craftsmanship.

Evolution by Broseley is our range of stoves which can only be purchased at the showrooms of Broseley appointed stockists, not directly from the internet. Evolution is exclusive, and expanding. From the original collection of woodburning stoves, we now manufacture multifuel, gas and electric stoves, most of which are manufactured in our factories in the UK.

What all of our stoves share is quality of build and a level of efficiency over three times greater than an open fire. Balancing technical excellence with traditional skills is a delicate business. With the Evolution collection, Broseley have achieved this beautifully.

Boiler Stoves..... 26 - 27

2022 Ecodesign Ready

Ecodesign is the European-wide programme to lower emissions and will be in force in the UK from 2022. Here at Evolution by Broseley we are already manufacturing stoves that will comply with the new Ecodesign programme, such as the **Ignite and Desire Widescreen (woodburning) stoves** and the new **Rota, Rota Tre & Polar Neo Aqua stoves**.

Ecodesign stoves are designed to burn at higher levels in the fire box. This greatly reduces the organic particles that are normally released from a pre Ecodesign multifuel stove. This in turn significantly reduces the level of emissions from woodburning and has a positive impact on carbon reduction. Wood is a renewable energy and virtually carbon neutral.

Evolution and the environment

What's better for home life is good for the planet too. Wood is not only a renewable source of energy, it's also carbon neutral. That's because during its lifetime a growing tree absorbs as much, if not more carbon dioxide than it emits when it burns or decays.

Using your stove to burn wood reduces the need for central heating which consumes non-renewable fossil fuels.

Energy efficiency class (EEC)

Evolution by Broseley multifuel stoves hold energy efficiency class (EEC) ratings of A+ & A, making them top of their class when it comes to reducing your carbon footprint. At Evolution by Broseley we are proud to highlight the energy efficiency class ratings given to us for our multifuel stoves.

Smoke exempt

Those of us who live in towns and cities dwell in smoke control areas as defined by the Clean Air Act.

Here you are permitted only to burn smokeless fuel or use woodburning appliances which have passed the emissions tests set by the Department of Environment Food and Rural Affairs (DEFRA).

So efficiently do Evolution by Broseley stoves convert wood to heat, they bear the Smoke Exempt seal.

Introducing Actiview™

People are rightly attracted to install a stove because it makes such a visible difference to a room. But remember, burning fuel creates deposits. These can settle on the glass front and obscure the view.

You can mitigate the effect by choosing kiln dried logs with low moisture content, but Evolution by Broseley's new Actiview™ system goes further. It enables the stove itself to keep its own glass clean for longer.

Like all fires, a stove needs an airflow to ignite the fuel and keep it burning. The difference with an Evolution by Broseley stove is that a system of hidden ducts and channels directs three types of airflow into the fire.

Beacon

ELECTRIC STOVE

Manufactured in Britain, the Beacon timber stove in Matt Black or Ash White finish has the distinct appearance of Steel and is available in two sizes to suit any home. There’s no need for a chimney or flue, simply position in place and plug in to enjoy the glorious ultra-realistic flame effect and glowing log bed.

Conveniently control the 2kW heat output with the 7 day programmable thermostat remote control or enjoy the ambience of the flame effect only setting on warmer evenings.

The Beacon inset electric stove perfectly complements any timber or marble surround, with a Matt Black painted finish and realistic glowing log bed. Designed and manufactured in the UK, the warmth of the 2kW heat output is enough to create a cosy ambience in any room.

Freestanding Beacon is available in 2 sizes and 2 colours

Made from timber for a lighter weight stove and realistic warming flame effect

Beacon inset is available in 2 sizes and both will fit into a standard 16" backpanel opening

Decorative flues are available as an additional extra (See Pg 28)

Comes with 7 day programmable thermostat remote control

Vue

ELECTRIC STOVE

Incorporating the latest LED technology to boast an ultra-realistic flame effect and pulsating log bed, behold the stunning Vue electric stove in Matt Black finish with glass top. Built from Steel and complete with 3 height options within one box, the Vue is an easy to assemble, freestanding stove.

The charming glass top houses the simple and easy to operate touch controls and a 7 day programmable thermostat remote control allows the 1.8kW heat output and flame intensity to be set to your preference. Admire the glowing log bed and mesmerising flame effect via 3 large windows which allow a full 180 degree view.

Heslington

ELECTRIC STOVE

The Heslington freestanding electric stove is built from Cast Iron in a Matt Black finish; enjoy the landscape of flames amongst the realistic glowing log bed, through the wide arched window. Control the warmth of the 2kW heat output and the intensity of the flame effect with a 7 day programmable thermostat remote control.

With slimline proportions, the Heslington can sit on a standard sized hearth and radiate enough heat for comforting warmth throughout the room.

Modern simplicity combined with traditional design makes the Heslington a desirable addition to any home.

Available with an Arched Lattice door as standard or optional plain door.

Ora

ELECTRIC STOVE

The traditional Ora 5 & 7 freestanding electric stove boasts a gentle arched window set into a Cast Iron door with Steel body. Beautifully finished in Matt Black, the realistic glowing log bed shimmers beneath the dancing flames; enjoy up to 2kW heat or flame effect only, saving energy and money.

The 7 day programmable remote control also adds the element of convenience to your stove.

The compact Ora inset electric stove has a stylish Steel body and robust Cast Iron door in Matt Black finish, making it a beautiful addition to any room. The panoramic window allows a stunning view of the brand new, ultra-realistic flame effect and glowing log bed.

A slim 69mm inset depth ensures a flat wall fit with any 75mm rebate surround to gain that true stove appearance.

Desire

ELECTRIC STOVE

Desire 6 electric

Our Desire electric stoves provide the shimmer and smoulder of a coal burning stove but in the most convenient form. This Steel construction in Matt Black finish is available in three sizes, each providing up to 2kW heat output and a 7 day programmable thermostat remote control.

With a large panoramic window, the realistic flame effect can be enjoyed with or without heat any time of the year.

Desire inset electric

With a stylish Matt Black finish, the Steel construction of the Desire inset electric stove is sure to add character to your room. The curved window allows you to witness the enticing glow any time of the year with a flame effect only setting. Install within an existing fireplace or pair with a 75mm rebate surround to get the perfect flat wall fit.

Ignite

MULTIFUEL STOVE

Built from steel in Britain, the adaptable Ignite range has a Cast Iron door with a Matt Black finish and a soft curve to the base. The log store adds convenience of not having to fetch fuel from outside. The heat output of these multifuel stoves are 5kW or 7kW and their efficiency is exceptional.

The Ecodesign compliant Ignite 5 Widescreen offers the larger viewing window from the 7 with the added benefit of producing 5kW of heat.

The Cast Iron door is softly arched and the grate front is wave-shaped, adding to the enjoyment of the Actiview™ clean panorama of flames. With a choice of top or rear flue outlet, you can position the stove inside an existing hearth or freestanding against an external wall.

DEAS KIT available. Ask your retailer about our direct air supply kit which pulls external air into your stove helping to prevent drafts in your home.

Widescreen only

Desire 5 Widescreen with log store

Desire

MULTIFUEL STOVE

This British built stove is simplicity itself. Its primary and secondary air controls make it easy to regulate, and Actiview™ technology keeps the glass clean on the steel door. The 5kW output is ideal for a small to medium sized room, whereas the 7kW has ample capacity to heat a medium to large sized room.

The Ecodesign Compliant (woodburning) Desire 5 Widescreen offers the larger viewing window from the Desire 7, and has the added benefit of producing 5kW of heat. This is the perfect choice if you need a larger stove but do not require a high heat output.

An optional air intake directs air from outside directly into the stove's combustion chamber, an advantage in draught-free, well-sealed modern houses.

All the features of the Desire 5 and 7 are available with the extra convenience and visual appeal of an integral log store.

DEAS KIT available. Ask your retailer about our direct air supply kit which pulls external air into your stove helping to prevent drafts in your home.
